

MISBAH MUSTAFA

ARTIFICIAL INTELLIGENCE & MACHINE LEARNING ENGINEER | DATA SCIENTIST & RESEARCHER

Phone: +92-328-4257188 Location: Muslim Town, Lahore Email: misbahmustafam@gmail.com

PROFILE

Motivated and hardworking professional with a solid foundation in Artificial Intelligence, Data Science, and Machine Learning. Skilled in building AI-based and data-driven solutions, with hands-on expertise in Python, data analysis, and predictive modeling to support critical business decision-making.

EDUCATION

ADP in Artificial Intelligence

The Superior University, Lahore

Full Stack AI - Data Science & ML

Nexskill, Arfa Tower, Lahore

SOFT SKILLS

- Analytical Thinking:** Interpreting complex data & extracting insights.
- Problem-Solving:** Formulating data-driven, practical solutions.
- Communication:** Explaining technical concepts clearly.
- Teamwork:** Collaborative work with cross-functional teams.
- Adaptability:** Rapid learning in evolving tech environments.

LANGUAGES

Urdu (Native)

English (Professional)

Available upon request.

TECHNICAL SKILLS

Python: Clean, reusable, and efficient coding for data-driven automation, scripting, and performance optimization.

NumPy: Vectorized computing, n-dimensional array manipulation, broadcasting, slicing, indexing, and statistical operations.

Pandas: DataFrames manipulation, handling missing/duplicate values, filtering, feature transformation, and pivot aggregation.

Matplotlib & Seaborn: Exploratory 2D plotting (scatter, bar, histogram, line), graph styling, annotations, and visual reporting.

Scikit-learn: Supervised ML (Linear & Logistic Regression), classification, regression, feature scaling, and model evaluation metrics.

Web Scraping: Extracting structured data from live web sources using Python and compiling clean structured datasets.

Developer Tools: Git, GitHub, VS Code, Jupyter Notebook, Microsoft Office Suite.

PROJECTS

Stock Price Prediction Model

Applied machine learning algorithms on historical financial stock datasets for price forecasting, feature engineering, and trend pattern recognition.

Machine Learning Classification & Regression

Engineered end-to-end predictive pipelines with Scikit-learn, implementing data preprocessing, hyperparameter optimization, and accuracy metrics.

Data Analysis & Visualization Suite

Conducted thorough EDA on complex datasets using NumPy and Pandas; generated analytical visual dashboards with Matplotlib to drive data decisions.

EXPERIENCE

Teaching Instructor

01 Year

Planned and delivered conceptual lessons aligned with student learning objectives; simplified technical problem-solving concepts.

E-commerce Executive

Online

Managed day-to-day digital store operations, organized product listings, and supported online business sales fulfillment.

Digital Marketing Assistant

Office Marketing

Assisted with social media presence, coordinated marketing campaigns, and created tailored digital content for online audiences.
